Other: Responsive Design, Git, Agile

PROFESSIONAL EXPERIENCE

Full Stack Developer | WebApps Global | 2021 - Present
- Develop full-stack web applications using React and Node.js
- Build responsive user interfaces with React.js and modern CSS
- Create RESTful APIs using Express.js
- Design MongoDB schemas and integrate with frontend
- Develop reusable React components for team use
- Ensure cross-browser compatibility and responsive design
- Participate in code reviews and pair programming
- Work in agile environment with 2-week sprints

Junior Developer | TechHub | 2020 - 2021
- Built features for web applications using React and Node.js
- Created responsive landing pages and web interfaces
- Integrated third-party APIs into applications
- Learned full-stack development practices

EDUCATION

Bachelor of Science in Software Engineering
University of Florida | 2020

PROJECTS

Task Manager App (React, Node.js, MongoDB)

- Full-stack application with user authentication
- Responsive design for mobile and desktop

Recipe Sharing Platform (React, Express, PostgreSQL)
- Built social platform for sharing recipes
- Implemented user profiles and search functionality

STRENGTHS

- Strong frontend development with React
- Comfortable building REST APIs
- Good understanding of responsive design
- Learning TypeScript to improve code quality
- Experience integrating APIs in React applications
